AMENDMENT TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A method of data entry at a device, comprising:

receiving voice data at the device;

transmitting the voice data and a device identifier to a computer; and at the computer,

translating the voice data to text;

determining whether to filter the translated text; and

<u>if</u>when it is determined that the translated text is to be filtered, applying a filter to the translated text.

- 2. (original): The method of claim 1, further comprising storing a user profile in a data store connected to the computer.
- 3. (original): The method of claim 2, wherein the user profile comprises a voice print.
- 4. (original): The method of claim 3, further comprising translating the voice data to text using a voice print.
- 5. (original): The method of claim 1, wherein determining comprises extracting one or more key

words from the translated text.

- 6. (original): The method of claim 5, wherein a filter is selected based on one or more extracted key words.
- 7. (original): The method of claim 1, wherein applying the filter comprises formatting the translated text.
- 8. (original): The method of claim 7, wherein formatting comprises formatting the translated text for an application.
- 9. (original): The method of claim 7, wherein formatting comprises formatting the translated text for the device.
- 10. (original): The method of claim 1, further comprising returning translated text to the device.
- 11. (original): The method of claim 1, further comprising returning filtered text to the device.
- 12. (original): The method of claim 11, further comprising returning the filtered text via an electronic mail message.

- 13. (original): The method of claim 1, further comprising returning data to a device other than the device at which voice data was received.
- 14. (currently amended): An apparatus, comprising:
 - a device for receiving and transmitting data;
- a computer having a data store coupled thereto, wherein the data store stores data, connected to the device; and

one or more computer programs, performed by the computer for:

receiving voice data and a device identifier from the device;

translating the voice data to text;

determining whether to filter the translated text; and

<u>ifwhen</u> it is determined that the translated text is to be filtered, applying a filter to the translated text.

- 15. (original): The apparatus of claim 14, further comprising storing a user profile in a data store connected to the computer.
- 16. (original): The apparatus of claim 15, wherein the user profile comprises a voice print.
- 17. (original): The apparatus of claim 16, further comprising translating the voice data to text using a voice print.

- 18. (original): The apparatus of claim 14, wherein determining comprises extracting one or more key words from the translated text.
- 19. (original): The apparatus of claim 18, wherein a filter is selected based on one or more extracted key words.
- 20. (original): The apparatus of claim 14, wherein applying the filter comprises formatting the translated text.
- 21. (original): The apparatus of claim 20, wherein formatting comprises formatting the translated text for an application.
- 22. (original): The apparatus of claim 20, wherein formatting comprises formatting the translated text for the device.
- 23. (original): The apparatus of claim 14, further comprising returning translated text to the device.
- 24. (original): The apparatus of claim 14, further comprising returning filtered text to the device.

- 25. (original): The apparatus of claim 24, further comprising returning the filtered text via an electronic mail message.
- 26. (original): The apparatus of claim 14, further comprising returning data to a device other than the device at which voice data was received.
- 27. (currently amended): An article of manufacture comprising a program storage medium readable by a computer and embodying one or more instructions executable by the computer to process data entered at a device, comprising:

receiving voice data at the device;

transmitting the voice data and a device identifier to a computer; and at the computer,

translating the voice data to text;

determining whether to filter the translated text; and

ifwhen it is determined that the translated text is to be filtered, applying a filter to the translated text.

- 28. (original): The article of manufacture of claim 27, further comprising storing a user profile in a data store connected to the computer.
- 29. (original): The article of manufacture of claim 28, wherein the user profile comprises a voice

print.

- 30. (original): The article of manufacture of claim 29, further comprising translating the voice data to text using a voice print.
- 31. (original): The article of manufacture of claim 27, wherein determining comprises extracting one or more key words from the translated text.
- 32. (original): The article of manufacture of claim 31, wherein a filter is selected based on one or more extracted key words.
- 33. (original): The article of manufacture of claim 27, wherein applying the filter comprises formatting the translated text.
- 34. (original): The article of manufacture of claim 33, wherein formatting comprises formatting the translated text for an application.
- 35. (original): The article of manufacture of claim 33, wherein formatting comprises formatting the translated text for the device.
- 36. (original): The article of manufacture of claim 27, further comprising returning translated

text to the device.

- 37. (original): The article of manufacture of claim 27, further comprising returning filtered text to the device.
- 38. (original): The article of manufacture of claim 37, further comprising returning the filtered text via an electronic mail message.
- 39. (original): The article of manufacture of claim 27, further comprising returning data to a device other than the device at which voice data was received.
